

Our 6 Steps to creating your Web Site

1. Initial Contact

This step is the initial contact between you and jvpflyerdesigns.jacksonsvp.com, either via phone, email or appointment. We can give you a free estimate at this point. If you decide that you want us to design your website, we move on to the next step.

2. Discovery

The discovery step consists of gathering information that will be used to design your website. Completing the [website questionnaire](#) will give us most of the information we need. In order for us to better understand your website design needs, we would appreciate it if you would answer the questions on the "[website design questionnaire](#)."

To begin work on your website we require that you sign a contract and make the appropriate deposit. This deposit can be paid via a check, money order, or Paypal (preferred).

3. Getting a domain name and a hosting Company

At this point, we sign up for a domain name and get a hosting company. Or, you can acquire a hosting company yourself. I use www.dot5hosting.com or www.startlogic.com (very reasonable rates) with substantial storage (200GB), 2000GB transfer and free domain name for about \$6 a month. You can check if the domain name you want is available at their website.

4. Sample Design

After we receive your website information we will post a sample layout on line for you to review, comment and suggest changes. This step is very critical because your new website will be based on the sample that you approve.

5. Development

When we have a sample that you have approved we will then start building your website, adding content, photos etc. ***You may provide us text and/or literature to create your site or we will be glad to write the text and literature for your site.*** As we build your site, you can see the progress online. Once the site is completed you will be able to review the site and make any final edits to the content or design.

6. Publishing

Once the website has been built and approved we will then submit the site to the various free internet engines. You will then pay the remaining balance due on your contract. You will get a CD with all your website information. At this point the site is yours to change as you wish, you can continue to have us edit and maintain your site with our low hourly [maintenance](#) rate.
